

Tic Tac® Box (card stock box sized for Tic Tac Big Pack containers)

Pattern & Instructions © Kimberley Morris, procrastistamper@gmail.com

You can get one Tic Tac® Box per 8-1/2" x 5-1/2" sheet of card stock, or per 6"x6" sheet of card stock. The diagram below shows cut and score marks, when starting with an 8-1/2" x 5-1/2" sheet.

BLACK LINES = SCORE MARKS **RED LINES = CUT MARKS** **BLUE AREAS = UNUSED CARD STOCK**

8-1/2"x5-1/2" Instructions: First cut away 2-3/4" from the right side of the sheet, leaving a sheet that is 5-3/4" wide by 5-1/2" tall. Next, score parallel to the 5-1/2" side at 3/4", 2-1/2", 3-1/4", and 5". Turn the sheet 1/4 turn and score parallel to the 5-3/4" side at 1", 1-3/4", and 4-3/4". After scoring, cut on the scored lines indicated in red, trimming away any parts indicated in blue. Use the 3/4" Circle Punch to cut out the half circle indicated in grey.

6"x6" Instructions: When starting with a 6"x6" piece, first cut away 1/2" from the top, then cut away 3/4" from the side of the sheet, leaving a sheet that is 5-3/4" wide by 5-1/2" tall. Then, score as directed above.

TIP: To get the best results when scoring, you'll want to be able to fold TOWARDS each raised bump created by a score mark. For this project, make your score lines with your card stock face up (this is very important if you are using Textured card stock). Then, after you make your score lines, flip your card stock face down, BEFORE cutting along any of the score lines. The raised side of the score marks will be folded inside your box.

To finish assembly, simply fold into a box, adhere, and decorate as desired. If you wish to stamp a background onto the entire box surface, this is easiest if done before assembling.
